WORK/EXPERIENCE

CUSTOMER SERVICE REPRESENTATIVE

WIPRO - Noida

From Nov 2022 - APRIL 2023

- Provided exceptional customer service through chat process, ensuring prompt and accurate responses to inquiries and concerns.
- Actively listened to customers, understanding their needs and delivering tailored solutions to enhance satisfaction.
- Multitasked efficiently, navigating systems and tools to gather and provide accurate information.
- Collaborated with cross-functional teams to escalate complex issues and contribute to process improvements.

PROJECT

STUDENT MANAGEMENT SYSTEM

Final Year Project

Nov 2021 - Dec 2021

- Developed the front-end using HTML, CSS, JavaScript, Bootstrap, PHP and used MySQL as the database to store student's information.
- Admin controls where admin can add, update and delete the data as well as their marks.
- Students can view their performance and track their records.
- Email verification through 4-digit code is used to verify when a new student registers.
- Forgot password feature is used by both the student and the admin to recover password.
- Landing page where the student and admin can login to their respective dashboards.
- Result section for the students to see their marks.

FACIAL RECOGNITION ATTENDANCE SYSTEM

Final Year Project

April 2022 - May 2022

- Developed using Python and MySQL as the database.
- Modules used are tkinter for designing the user interface and Face Recognition module to identify faces.
- Pictures are added with students information in order to map the image with the students details..
- Facial recognition identifies the student by comparing the captured with the pre-fed image of the student.
- An entry is made to an excel spreadsheet with the students name, roll number, date and time.
- Login page for the admin with user id and password stored in database.
